**To Keith Pignolet
Wildeck Inc.**

We purchased our first Wildeck Mechanical VRC through Felix Loeb earlier this year, and after evaluating its construction and performance, we took possession of our second one yesterday. We have experience with other lifts, and in my opinion Wildeck offers more for the money than the competition. The AutoSenz feature sets the Wildeck product apart from the competition, and the range of options offered by Wildeck allowed us to design the equipment around our specific requirements. Our operation involves multi-shift production with very little down time, and we require equipment that will provide reliable performance. I am satisfied that the Wildeck VRC is the best option for our business.

**Best Regards,
Bernie Woziwodzki
Ferrara Pan Candy**
