

and increase profitability?

Who is Wildeck?

Wildeck is the largest U.S. manufacturer of mezzanines, Vertical Reciprocating Conveyors (VRCs), and safety guarding products for the safe and efficient handling, storage and movement of materials. With more than 30 years of material handling experience, Wildeck has successfully placed its custom and modular mezzanines and VRCs in hundreds of dealership parts rooms across the country.

Quality Wildeck products have stood the test of time. They are durable, reliable, safe and will help you to effectively utilize your vertical and horizontal space.

Visit our website at www.wildeck.com or e-mail info@wildeck.com to find the right solution to help your Automotive Parts Room succeed.

How can you maximize space...

Why Wildeck

Wildeck Automotive Specialists have the background to evaluate and transform your parts room into an efficient, revenue generating operation.

Each Specialist has from 10 - 30 years experience in the material handling industry and some have even walked in your shoes as a Parts Room Manager.

From mezzanines to material lifts, safety guard rail and more, Wildeck Automotive Specialists can help your parts room be everything you need it to be.

Wildeck invites you to utilize this wealth of knowledge and experience. Our Automotive Specialists work with you, your architect and GC on your retrofit, expansion, or new construction project.

Contact Wildeck today to connect with the Automotive Specialist in your area.

Wildeck Automotive Specialists Fulfill Your Parts Room Needs.

Let A Wildeck Automotive Specialist
Optimize Your Parts Room.

STORING

Mezzanines

A freestanding steel mezzanine can increase the available vertical storage capacity in your dealership's parts room. A Wildeck Automotive Specialist can measure your parts room, help you plan the design and layout, choose the right equipment, oversee delivery and installation, and help you with any future material handling needs.

Wildeck Automotive Specialists can help you realize the benefits and tax advantages of installing a mezzanine to improve the efficiency and storage capacity of your parts room.

Lifts simplify moving awkward and heavy items to the mezzanine level.

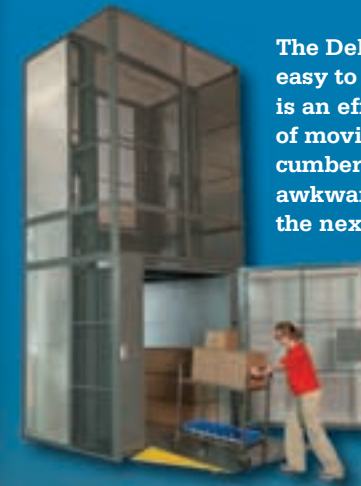

Increase the storage capacity in your dealership with a quality Wildeck mezzanine.

LIFTING

VRC (Vertical Reciprocating Conveyor)

Utilize a Wildeck VRC to move your slow-moving, sheet metal parts or tires upstairs while putting fast-moving parts closer to your counter. VRCs have small footprints and are a safe and cost-effective way to lift your parts to a 2nd or 3rd level. Contact Wildeck to speak with an Automotive Specialist on incorporating a VRC into your facility.

The Delta® Lift is easy to install and is an efficient means of moving heavy, cumbersome, and awkward items to the next level.

A Delta® Lift can safely move up to 2,200 lbs and integrates easily into an existing parts room.

GUARDING

Safety Products

Wildeck Guarding Products are tested, trusted, tough and protect people and equipment from fork truck traffic and loading zones. Use Wildeck Guarding Products to protect in: loading zones, shelving areas, and pedestrian walkways.

Wildeck manufactures a full line of Guarding Products which include: safety gates, bollards, machine guards, guardrail, railings, etc.

Strong, durable steel Wilgard® guardrail protects equipment, walkways and pedestrians in your facility.

Highly visible Wildeck safety bollards protect your overhead doors and equipment in your service area.
