

# ELEVATE YOUR STANDARDS

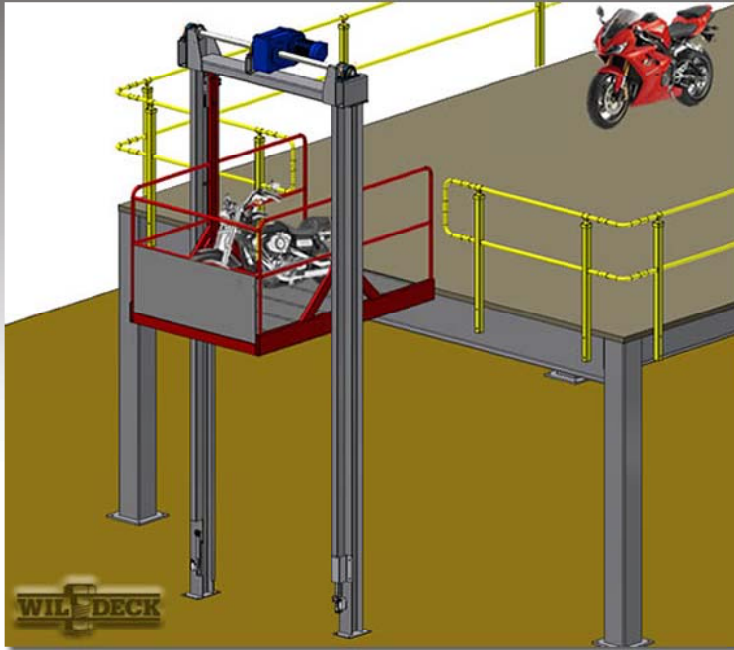

LIFTING

## Personal Recreational Vehicle Dealers

Wildeck provides material handling solutions in motorcycle, ATV, and personal watercraft dealerships. All of these personal recreational vehicle dealerships have many material handling and storage requirements that can benefit from mezzanine, VRC, and safety guarding solutions.

Motorcycles, ATVs, and personal watercraft units typically arrive fully assembled in crates. These crates and packaged parts are often stored on a second level or mezzanine. This is an ideal situation for a Wildeck VRC to efficiently move these items.

Personal recreational vehicle dealerships are dedicating more to the sales floor and shrinking their back rooms. The storage area easily becomes inefficient as more products and skews are added to inventory. Back room managers will be pleased at the increased optimization that Wildeck products provide for their ever-decreasing amount of space. Wildeck solutions can provide easy, safe access to products and inventory.

## OPTIONAL ENHANCEMENTS

### EZ PRO™ Operator Station

With Wildeck's optional EZ Pro Operator interface, authorized users can safely activate the lift using the key lock, quickly determine the location and status of the lift, and call or send material on its way.

### AutoSenz™ Overload Detection

Available on specific mechanical VRCs, Wildeck's innovative AutoSenz™ overload detection system, with easy-to-read graphical display interface, monitors and protects your VRC from jams or overload conditions.
