FUNERAL SERVICE INDUSTRY

VRC APPLICATION

Funeral Service Industry

Did you know that according to the US Census Bureau a death occurs every 14 seconds?

Due to this astounding statistic, there is great opportunity for the utilization of a Wildeck VRC in the Funeral Service industry.

Many funeral homes are set up with the preparation and storage areas in the basement and viewing areas on the main or upper levels. A VRC is a highly efficient way to safely move heavy caskets between levels. The VRC can also move supplies, materials, and equipment as needed.

Wildeck's industry leading team is available to assist you as you work with your architect or general contractor. VRCs can be a cost effective alternative or addition to an elevator. A VRC can be designed in and added during new construction or can be retrofit into existing facilities.

VRCs are the ideal solution to transport caskets.

SPECIFICATIONS

VRC requirements for funeral homes are relatively standard; however, lift configurations are custom designed for each application.

- ▶ A 1,000 lb. capacity lift is typical
- ▶ Carriage dimensions will be in the range of 4 ft. x 7 ft.
- ▶ Cargo pads and/or rubberized chair rail add protection
- ▶ Smooth or traction decking available
- ▶ No solenoid interlocks to burn out
- ▶ Low profile 2-1/4" entrance ramp

OPTIONAL ENHANCEMENTS

EZ PRO™ Operator Station

With Wildeck's optional EZ Pro Operator interface, authorized users can safely activate the lift using the key lock, quickly determine the location and status of the lift, and call or send material on its way.

ArmorCar™ Carriage

The ArmorCar Carriage is fully enclosed to provide safe transport and prevent damage that can result from material or product falling off a standard carriage. The carriage is manufactured to meet your needs for safety, increased material protection, and reduced wear.
